17. CONFLICT OF INTEREST

17.1 A Bidder must not, and must ensure that its officers, employees, agents and advisors do not place themselves in a position that may give rise to actual, potential or perceived conflict of interest between the interests of the DBSA and the Bidder’s interests during the Tender Process.

17.2 The Bidder is required to provide details of any interests, relationships or clients which may or do give rise to a conflict of interest in relation to the supply of the services under any contract that may result from this RFP. If the Bidder submits its Bid and a subsequent conflict of interest arises, or is likely to arise, which was not disclosed in the Bid, the Bidder must notify the DBSA immediately in writing of that conflict.

17.3 The DBSA may immediately disqualify a Bidder from the Tendering Process if the Bidder fails to notify the DBSA of the conflict as required.

18. LATE BIDS

18.1 Bids must be delivered by the Closing Time. The Closing Time may be extended by the DBSA in its absolute discretion by providing written notice to Bidders.
18.2 Bids delivered after the Closing Time or lodged at a location or in a manner that is contrary to that specified in this RFP will be disqualified from the Tendering Process and will be ineligible for consideration. However, a late Bid may be accepted where the Bidder can clearly demonstrate (to the satisfaction of the DBSA, in its sole discretion) that late lodgement of the Bid was caused by the DBSA; that access was denied or hindered in relation to the physical tender box; or that a major/critical incident hindered the delivery of the Bid and, in all cases, that the integrity of the Tendering Process will not be compromised by accepting a Bid after the Closing Time.

18.3 The determination of the DBSA as to the actual time that a Bid is lodged is final. Subject to clause 18.2, all Bids lodged after the Closing Time will be recorded by the DBSA and will only be opened for the purposes of identifying a business name and address of the Bidder. The DBSA will inform a Bidder whose Bid was lodged after the Closing Time of its ineligibility for consideration. The general operating practice is for the late Bid to be returned within 5 (five) working days of receipt or within 5 (five) working days after determination not to accept a late Bid.

19. BIDDER’S RESPONSIBILITIES

19.1 Bidders are responsible for:

19.1.1 examining this RFP and any documents referenced or attached to this RFP and any other information made or to be made available by the DBSA to Bidders in connection with this RFP;

19.1.2 fully informing themselves in relation to all matters arising from this RFP, including all matters regarding the DBSA’s requirements for the provision of the Services;

The submission of such certificates must comply with the requirements of instructions and guidelines issued by National Treasury and be in accordance with the applicable notices published by the Department of Trade and Industry in the Government Gazette.

19.4 The DBSA reserves the right to require of a Bidder, either before a Bid is adjudicated or at any time subsequently, to substantiate any claim in regard to preferences, in any manner required by the DBSA.

19.5 Failure to provide the required information may result in disqualification of the Bidder.

20. PREPARATION OF BIDS

20.1 Bidders must ensure that:
   20.1.1 their Bid is submitted in the required format as stipulated in this RFP; and
   20.1.2 all the required information fields in the Bid are completed in full and contain the information requested by the DBSA.

20.2 The DBSA may in its absolute discretion reject a Bid that does not include the information requested or is not in the format required.

20.3 Unnecessarily elaborate responses or other representations beyond that which is sufficient to present a complete and effective tender proposal are not desired or required. Elaborate and expensive visual and other presentation aids are not necessary.

20.4 Where the Bidder is unwilling to accept a specified condition, the non-acceptance must be clearly and expressly stated. Prominence must be given to the statement detailing the non-acceptance. It is not sufficient that the statement appears only as part of an attachment to the Bid or be included in a general statement of the Bidders usual operating conditions.

20.5 An incomplete Bid may be disqualified or assessed solely on the information completed or received with the Bid.

21. ILLEGIBLE CONTENT, ALTERATION AND ERASURES

21.1 Incomplete Bids may be disqualified or evaluated solely on information contained in the Bid.

21.2 The DBSA may disregard any content in a Tender that is illegible and will be under no obligation whatsoever to seek clarification from the Bidder.

APPOINTMENT OF A PROFESSIONAL SERVICE PROVIDER TO UNDERTAKE ASSESSMENTS AS A SCOPING EXERCISE FOR THE DEVELOPMENT OF INFRASTRUCTURE ASSET MANAGEMENT PLANS FOR FIVE (5) INTERMEDIATE CITY MUNICIPALITIES
1. Background

In April 2016 cabinet adopted the Integrated Urban Development Framework (IUDF) as the official national urban policy of government under the custodianship of the Department of Cooperative Governance (CoGTA). The IUDF marks a new deal for South Africa’s cities and towns. It sets a policy framework to guide the development of inclusive, resilient and liveable urban settlements, while addressing the unique conditions and challenges facing South Africa’s cities and towns. The key outcome of the IUDF is spatial transformation and to create a growth model of compact, connected and coordinated cities and towns.

Whilst the IUDF responds to the National Development Plan (NDP), it also responds to urbanization challenges that South Africa (SA) is faced with. In its response to urbanisation, the IUDF makes it clear that it does not do so in a manner that treats urbanization as an antithesis of rural development, thereby, acknowledging the importance of urbanization as it has implications to both urban areas, i.e. large cities/metros and small and rural towns. In order to demonstrate this, the implementation of the IUDF was conceptualized across a spectrum of municipal spaces.

As part of the process to implement the IUDF, CoGTA, herein, referred to as the Department, agreed to collaborate with National Treasury (NT) and the South African Local Government Association (SALGA) as key IUDF implementation partners. National Treasury was assigned with the responsibility to implement the IUDF within metropolitan municipalities, and the South African Local Government Association was assigned with the responsibility to implement the IUDF in small towns and rural areas. Implementation of the IUDF in intermediate cities is the responsibility of CoGTA. The NT programme to implement the IUDF in metropolitan municipalities was called the City Support Programme (CSP), while the SALGA programme was called the Small Towns Regeneration (STR) Programme.

With the implementation of the IUDF a new grant, Integrated Urban Development Grant was also introduced. The Integrated Urban Development Grant (IUDG) was introduced in the 2019/20 Division of Revenue Act as a consolidated grant for Intermediate City Municipalities. The introduction of this grant was in support of the Integrated Urban Development Framework; an element of a support programme for Intermediate City Municipalities; and is guided by the recommendations of the Review of Local Government Infrastructure Grants undertaken in 2013. A Review of Local Government Infrastructure Grants was initiated in October 2013, led by National Treasury together with the Department of Cooperative Governance, the Financial and Fiscal Commission, the South African Local Government Association, and the Department of Performance Monitoring and Evaluation. The review envisioned a grant system that included:
• Greater differentiation in the type of grants going to different municipalities;
• A move from focussing on rolling out new infrastructure to increased focus on the management and renewal of existing infrastructure;
• Ensuring greater value for money for the funds spent; and
• Ensuring greater coherence in the management of the grant system.

The Integrated Urban Development Framework is consistent with and reinforces the findings of the Review of Local Government Infrastructure Grants. The design of the IUDG has responded to both. This local government infrastructure grant has a core role in delivering on Levers 4 and 2 of the Integrated Urban Development Framework, which relate to ‘integrated urban infrastructure’ and ‘integrated transport and mobility’ respectively. In addition, Lever 9, ‘sustainable finances’, speaks explicitly of incentivising infrastructure provision that is more integrated through an improved conditional grant framework.

The IUDG is a schedule 5(B) grant in terms of the Division of Revenue Act (DoRA), overseen by the department of Cooperative Governance and Traditional Affairs (CoGTA). The grant exists to provide specific capital finance for eradicating basic municipal infrastructure backlogs for poor households, microenterprises and social institutions servicing poor communities. The desired outcome is improved access to basic services infrastructure for poor communities.

Purpose of the Integrated Urban Development Grant

The purpose of the IUDG is:

To provide funding for public investment in infrastructure for the poor and to promote increased access to municipal own sources of capital finance in order to increase funding for public investment in economic infrastructure; to ensure that these public investments are spatially aligned and to promote the sound management of the assets delivered.

The IUDG aims to achieve three broad outcomes in order to achieve its strategic goal:

• Improved access to municipal infrastructure.

• Improved quality of municipal services through infrastructure that is in better condition.

• Improved spatial integration.

One of the underlying principles for the IUDG is that the assets financed through a grant must be well managed. An evaluation of the performance of South African municipalities with regard to infrastructure delivery shows that municipalities have in fact been fairly effective at delivering new infrastructure: while backlogs remain intransigent, significant new infrastructure investments have been made over the past 20 years. However, in too many cases this infrastructure has not been
well managed: investments in renewal and maintenance have been inadequate and the result is infrastructure that is in poor condition with failure rates unacceptably high.

Promoting sound asset management (including balanced expenditure on renewal) will therefore ensure that infrastructure remains functional and thus that public investment in infrastructure does in fact result in functional urban environments on a sustainable basis.

As the state organ responsible for driving the implementation of the IUDF in general and the support to intermediate city municipalities in particular, the Department of Cooperative Governance has collaborated with the Development Bank of Southern Africa (DBSA) amongst other partners for the implementation of specific elements of the ICM Programme.

2. Problem Statement

Effective management of municipal infrastructure is central to municipalities providing an acceptable standard of services to the community. Infrastructure impacts on the quality of our living environment and opportunities to prosper. Not only is there a requirement to be effective, but the manner in which municipalities discharge their responsibilities as public entities is also important. Municipalities must demonstrate good governance and customer care, and the processes adopted must be efficient and sustainable. Councillors and officials are custodians on behalf of the public of infrastructure assets, the replacement value of which even in a small municipality, can amount to several hundred million Rand, and in larger ones, to several billion Rand.

In recent decades, concerns over poor service performance (often only highlighted during high profile failure of infrastructure) and unnecessary loss of asset value (arising from inadequate maintenance and capital renewal) has driven governments across the globe to demand improvements in infrastructure management practice in the public sector. Key themes of the latest generation of legislation introduced in this country relating to municipal infrastructure management include:

- long-term sustainability and risk management;
- service delivery efficiency and improvement;
- performance monitoring and accountability;
- community interaction and transparent processes;
- priority development of minimum basic services for all; and
- the provision financial support from central government in addressing the needs of the poor.
As municipalities pursue the eradication of backlogs in basic services, concerns are emerging over the deterioration of existing infrastructure and the sustainability of the new infrastructure being built. The problem is worst at municipalities where revenues are under pressure due to either large indigent populations, poor debt collection performance, or both.

The leadership of a municipality needs to take some tough decisions on its service delivery priorities, enforcement tactics, and tolerance to risk in shaping its vision. This process will be informed by political objectives, legal compliance, and community consultation. The challenge to officials is to effectively communicate relevant and holistic information to the decision-makers to inform this process. Asset management planning provides a sound framework within which these decisions can take place. The asset management objective is often stated as “to provide affordable levels of service that have been agreed with customers in the most cost-effective way for present and future customers”. In most cases this is understood to mean that asset management is the link between strategic and operational planning.

3. Objectives of the project

In line with the Infrastructure Asset Management Guidelines the key objectives of the assignment include:

These guidelines propose a framework as illustrated in figure 2-1, which includes the following key asset management documents and systems:-

- A policy statement which provides the over-arching principles and organisational objectives for managing the municipality’s infrastructure to give effect to its vision.

- An asset management strategy which indicates the processes the organisation will use to put the policy into effect, providing specific criteria, measures and goals (which logically should be aligned with the performance management system of the municipality). The strategy should also indicate the approach to be taken to manage risk, and the municipality’s appetite for risk (alternatively this could be addressed in a separate corporate risk management strategy). When commencing with a process of IAM, a municipality may not have sufficient information to prepare a strategy – in this case, a municipality may elect to commence with the preparation and updating of Infrastructure Asset Management Plans until sufficient information is available to prepare a strategy.
• An Infrastructure Asset Management Plan (IAMP) which sets out the sector needs and priorities, levels of service, future demand, capital works and O&M programmes and strategies, and funding plans. This plan will be updated on an annual basis.

• A Comprehensive Municipal Infrastructure Plan (CMIP) which considers cross-sector priorities and issues and presents a holistic long term plan for the municipality’s infrastructure assets. This plan will be updated on an annual basis, and will be integrated with other management strategies and plans, such as Human Resources, Information Systems and Finances.

• The IAM planning process needs to be informed by relevant information on existing infrastructure and future needs, and this will normally be provided by an IAM System. Day-to-day operations (such as the management of capital programs and O&M) would be managed in line with the policy, strategy and plan, guided by operational systems (such as maintenance works).

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a "pe se" prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.
