21.3 The DBSA may permit a Bidder to correct an unintentional error in its Bid where that error becomes known or apparent after the Closing Time, but in no event will any correction be permitted if the DBSA reasonably considers that the correction would materially alter the substance of the Bid or effect the fairness of the Tendering Process.

22. OBLIGATION TO NOTIFY ERRORS

TERMS OF REFERENCE

**SUPPLY, INSTALL AND COMMISSION OF ELECTRICITY
METERS**

TERMS OF REFERENCE

The Development Bank of Southern Africa was created to catalyze economic growth through investment in economic and social infrastructure and supporting regional integration. Its strategic objectives are to drive sustainable growth in development impact; integrated infrastructure solutions and financial sustainability. The Bank has to unlock infrastructure to the value of R100bn per annum by 2020/2021 as per the Corporate Plan. Against this background, it is imperative to accelerate the development of competencies that will give the institution a competitive advantage both in current and future markets.

Purpose

As part of the DBSA's Off-grid energy project, a number of electricity meters are required to be installed in the building to collect specific energy consumption data during and after the project. The sub-meters will be used to measure individual wings and floors of the main DBSA building, individual building systems such as HVAC, lighting, or other systems and devices. The sub-metered data will be used to benchmark the building's energy use, measure energy use before and after implementing energy saving projects, identify energy improvement and retrofit opportunities through data variability and trends, create energy reports, perform measurement and verification for projects, calculate demand response or load shedding, find the most appropriate tariff structure and verify utility bills.

Request for Proposal

Proposals are hereby invited for the supply and installation of electricity metering system and infrastructure at the DBSA campus. The primary purpose of the metering system installed is to gather data to establish an electricity consumption baseline. Additionally, the metering infrastructure installed must meet the Green Building Council South Africa (GBCSA) requirements for monitoring future improvements

1. Proposal Requirements and scope

The main building at the DBSA constitutes 3 floors hosting office spaces plus the basement mainly hosting utility infrastructure. This building has 4 wings spread across all the 3 floors. The supplier is required to supply and install the number of meters given below in the main building and at other places mentioned below as part of planned Phase 1 scope of work. Phase 2 (future scope) will cover other metering requirements to meet Green Building certification.

Metering per floor

- (a) One (1) meter to be installed per DB per floor in the main DBSA building. Total meters required is **12**.

(b) twelve (12) data loggers for verifying lighting, plug-loads and HVAC (split units) consumption.

Other locations

- a. Two (2) meters recording the energy consumption by the **Chillers** at the main DB's located in the basement (next to transformer room). The Chillers are physically installed on the 2nd floor.
- b. Two (2) meters for the **air conditioning plants**.
- c. Three (3) meters recording the energy consumption by the **security lights** installed at three different DBs located across the campus.
- d. Two (2) meters recording the energy generation by the two **solar PV plants**. One PV plant is installed on the ground next to the Visitor Centre and the other plant is on the Training centre roof connected to the respective DBs in these buildings.
- e. One (1) meter installed at the **Canteen**.

Dashboard

The system must be capable of providing data on at least a 30 min basis as well as capture transients in usage. The captured data must always be available via a dashboard. The system provided must allow for data retrieval of up to 3 years within the same graph. The user should be able to select the desired time period for any time frame of interest and be provided with live graphs of retrieved data.

Data should be captured and available in such a way as to allow creators of dashboards to perform arbitrary time-series calculations and weightings as deemed necessary from time to time without the requirement for any additional expenditure in terms of software development of licensing.

No proprietary protocols, transmission methods, storage methods or authentication mechanisms will be allowed. All systems are to utilize hardware technology which is widely understood and easily accessible without license fees.

Tenderers are required to provide a "data liberation" plan which will allow the client to obtain all data captured in an open format upon request without any additional charges. Tenderers are to include any labour or sundry items required to make data liberation possible within their tender sum.

The data acquisition solution should allow for post-processing of data to augment any data with additional information should this be required at any time. For example, if a device name is changed or the client wishes to add the time of day or any other metadata to each data point captured, this should be possible to perform retroactively to existing data. Additionally, all meters should be Wi-Fi-enabled.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
