## **22. OBLIGATION TO NOTIFY ERRORS**

**PART E**

**TERMS OF REFERENCE & PROJECT BRIEF**

## 1. INTRODUCTION

This document serves as the requirement of the IPP Office for the study to be undertaken by a team of consultants appointed by the DBSA to consider alternative support mechanisms that will reduce the impact of the IPP Programmes on the balance sheet of the country including appropriate mechanisms for sub national or Municipal Independent Power Producers.

The Scope of Work (SOW) is described in this document. The requirements as specified in this document are to be followed for developing proposals by respondents.

## 2. BACKGROUND

All the IPP Programmes procured to date (Bid Windows 1-4) are underpinned by a government support regime set out in the Implementation Agreement (IA) entered into between the Department of Mineral Resources and Energy and each of the successful IPPs (the Seller). The 2020 procurement round of the Risk Mitigation IPPP and the 2021 Bid Window 5 of the Renewable Energy Independent Power Producers Programme (REIPPP) includes similar support.

The IA sets out the extent of the government support provided, which is limited to the following:

- Fulfilment of Eskom's (the Buyer) financial obligations in terms of the Power Purchase Agreement ("the PPA") should the Buyer fail to honour its obligations within specified timelines;
- Payment of termination payments in the event that government fails to honour its commitment to fulfil its payment obligations; and
- Payment of termination amounts in the event of Nationalization or Expropriation.

Issues relating to expropriation and nationalization are regulated in terms of section 25 of the Constitution of the Republic of South Africa and the Expropriation Act, 1975 (Act No. 63 of 1975) as amended. Despite the protection available under the Constitution and the Expropriation Act, the Department of Mineral Resources and Energy took a decision to regulate expropriation and / or nationalisation in terms of the IA to ensure certainty to all parties and to cap the exposure in line with the Standardised Provision for Public Private Partnerships (PPP) as published by the National Treasury in terms of Regulation 16.

The support in terms of the IA includes:

- **Government support of Eskom (“the Buyer”)**

Government provides support to the Buyer for its obligation to purchase energy under the “PPA” and the contingent obligation exists as a result of the Government being required to provide liquidity support to the Buyer for a period of six months (180 days) in order for the Buyer to settle its obligations to Sellers in terms of the PPAs.

- **Termination due to Government default including Expropriation or Nationalization**

The amount of compensation the Government would have to pay if the contract ended at an applicable date due to Government default, is calculated by determining the amount, in nominal terms, payable to the Seller at that point in time. The Exposure is the total termination amount or monetary compensation payable to the Seller at the date of termination or compensation, this amount is defined in clause 12 of the IA (Compensation on Termination for Government Default).

For the purposes of quantifying the contingent fiscal obligations the termination amount under Government Default include outstanding debt at the time of the termination plus the expected equity returns or the equity compensation as defined in the relevant IA entered into between the parties.

The total investment associated with the 91 projects procured and that have reached operations between 2010 and 2020 exceeds R200 billion. The contingent liabilities associated with all signed IPP contracts (91 PPAs) were calculated at R178 billion in December 2020 (April 2020 terms) and will flatten out towards 2041 when the last Power Purchase Agreements (PPA) of this 91 projects reach their expiry date.

The government support regime was originally designed to encourage the participation of the private sector to invest in electricity generation in South Africa in an environment where Eskom is the only buyer of this e. Government support was a requirement to ensure the success of the REIPPP and to ensure the bankability of the programme.

Consultations that the IPP Office had with the market as part of the preparation of new procurement rounds indicated that the Government support has to be retained for the Risk Mitigation programme and the planned Bid Window 5 of the REIPPP as the hiatus of nearly 5 years since the previous bid rounds had seriously impacted market confidence together with the further deterioration of the financial viability of Eskom as the single buyer.

The reality however is that there is very limited fiscal space to support a further roll out of the 2019 Integrated Resource Plan (IRP) under the same or similar support regime. The Second Determination issued by the Minister of Mineral Resources and Energy late 2020 provides for the procurement of 11.8 GW of electricity from IPPs.

The government support regime must however be read in the context of what was the end state anticipated at the start (2010). The intention was always that as the market matures, confidence in the programme grows, and the energy sector reforms are implemented to move to a fully-fledged competitive power market that the need for such a support will gradually reduce and eventually fall away. Furthermore the National Treasury in their assessment of the risk of default under the IPP Programmes considers it to be low<sup>1</sup>. IPP cost is a pass through paid by consumers. Regulation 10 of the New Generation Regulations enables Eskom, as the single buyer, to recover all costs in respect of the Section 34 Ministerial Determinations. This includes payments for the purchase of electricity from IPPs in terms of a PPA.

As part of opening up of the market, additional amendments were made to the New Generation Regulations which were published by the Minister of Mineral Resources and Energy in October 2020 to create a framework to enable Municipalities to obtain a Section 34 Ministerial Determination, to establish and buy electricity directly from, amongst others, IPPs. Any Municipality must, however, apply to the Minister to procure or buy new generation capacity, and such new generation capacity should have also been contemplated in the municipality's own Integrated Development Plan (IDP). Furthermore, a Municipality must submit proof that it has complied with the provisions of Section 120 of the Municipal Finance Management Act (MFMA) and the Municipal Public-Private Partnership (PPP) Regulations in those instances where the electricity is being procured from an IPP. This Feasibility study that must be undertaken will have to address issues of affordability, value for money and sustainability.

The development of support packages that do not increase the contingent liability exposures the country is a key consideration for the National Treasury to support any further procurement roll out under a Determination by the Minister of Mineral Resources and Energy.

It has therefore become critical to design and implement alternative support mechanisms and options that are aligned to amongst others; the end state of the South African energy sector as envisaged in The South African Energy White Paper of 1998, the process of unbundling Eskom as per the "Roadmap for Eskom in a Reformed

Electricity Supply Industry” that was published by the Department of Public Enterprises in November 2019 and the establishment of an independent buyer, system and market operator, as well as international best practice in this regard.

### 3. PURPOSE

The project objectives are stipulated below:

- The project will deliver a comprehensive study and recommendations based on international and local experience as well as best practice of the alternative mechanisms, products, measures available for consideration and implementation to address the following:
  - **Minimising the Government contingent liability exposure at a National Government Level**
  - **Alternative support options to be considered in future**
  - **Forward looking mechanisms:**
    - In the short term (recommend options for consideration within the current legislative and regulatory environment and the timelines for the roll out of Bid Window 6 which is planned for September/October 2021);
    - In the longer term (recommend options taking into consideration the envisaged unbundling of Eskom and the future procurement for 2022 onwards).
  - **Backward looking mechanisms**
    - Assessment of the current methodology of calculating the contingent liabilities associated with the IPP Programmes, the accuracy of the calculation of the exposure value as at April 2021 and the reporting thereof to the National Treasury.
    - Recommendations for improvement of the methodology and approach based on the lessons learned.
    - Mechanisms, strategies or products that can be implemented to reduce the existing contingent liability exposure associated with the IPP Programmes procured up to April 2021.
  - **Implementation support**
    - Develop a road map as to how to progress from the current state (support in case of termination for government default and where Eskom is the only Buyer) to an end state that includes an Independent System and Market Operator (ISMO) and/or multiple buyers. This should include a risk management framework and timeline for each of the scenarios identified in the road map.

- Draft wording for inclusion in the Request for Proposals (RFP), “the PPA” and IA under each scenario included in the road map and as may be the case.
- Assessment of the impact on the Contingent Liabilities associated with the roll out of all the planned future IPP Programmes under the 2019 IRP as per the proposed alternative mechanisms, methodologies and/or strategies.
- **Stakeholder engagements**
  - Participation in Steering Committee lead by the DMRE.
  - Support with the engagement of relevant role players such as the National Treasury, Municipalities and the Department of Mineral Resources and Energy as part of seeking approval for the implementation of recommendations in future bid rounds as appropriate.
  - Market sounding including engagements with Lenders, Institutional Investors and Developers.

#### **4. OVERVIEW OF REQUIREMENT**

The IPP Office is looking to procure the services of a suitably experienced team of consultants to apply international and local best practice as the basis of a comprehensive study that will amongst others:

1. Provide a comprehensive view of the alternative cost effective support packages that are available or can be designed to reduce the impact of the Independent Power Producers Programme on the country balance sheet over time. The report should make recommendations on both short term and longer term mechanisms that can be implemented at a National Government level.
2. Provide a comprehensive assessment of the current level of contingent liabilities associated with the IPP Programmes considering the methodologies applied and reporting thereof and include recommendations for improvements
3. Provide a comprehensive report of support packages to be considered in the case of multiple buyers as approved off takers.
4. Provide a road map for implementation of preferred alternative support mechanisms in the different scenarios, taking into consideration the envisaged end state for the electricity sector in South Africa.
5. Undertake stakeholder engagements and market testing as may be required to ascertain the viability of the recommended proposals.
6. Provide the necessary assistance (drafting of clauses to the procurement documentation) to implement the recommendations once approved.
7. Participate in a Steering Committee that will be established to drive this project and deliberate on outcomes.

It is anticipated that the work will be undertaken in collaboration with the Department of Mineral Resources and Energy, the IPP Office, The Department of Public Enterprises (DPE) and the National Treasury (NT).

It is anticipated that a Steering Committee headed by the DMRE will be established to guide and engage on the work as it progresses and will also sign off on the final deliverables.

Furthermore, it is expected that the resources required to give effect to the study will be sufficiently qualified and experienced in the areas of:

- national and international government/public sector finances,
- the development of credit enhancement products and other third party risk mitigation measures to ensure the bankability and sustainability of large and complex procurements and

- the evolution and regulation of electricity markets globally.

## 6 Proposal

2. Experience in the energy sector
3. Experience in structuring of Government support packages including credit enhancement packages;
4. Understanding of the current Approach and Methodology;
5. Applicable experience of the resources;
6. Deliverables (including timelines and cost per deliverable);
7. The table below is indicative of the deliverables, timeframes and must be completed stating the resource experience and cost.

TA must also note the following IPP Office requirements:

1. Approved POs are required for the rendering of any service by a third party or TA. No work instruction may be issued without an approved PO;
2. TAs assumes the risk when performing work without a PO or in excess of an approved PO amount, not the IPP Office.

Rates as per the DBSA contract and hours assigned to the deliverable need to be stipulated and deliverables clearly indicated. The budget owner is required to sign-off on PO requests.
5. Full payment of an invoice is dependent on IPP Office approval/acceptance of deliverables. TA invoices for work completed needs to reach the IPP Office for processing within a period of three months after submission/acceptance of deliverables.
6. Invoices received prior to the 1<sup>st</sup> working day of any month will be paid by the first Friday of the following month. Payment may be another month later if received after the 1<sup>st</sup> working day.

**CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Standard Bidding Document (SBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
  - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
