27.1 Bidders that passes functional criteria will qualify the Bid to move on to the second stage of evaluation, which is price and preferential point's evaluation. Bidders that do not pass the functional criteria will not be evaluated during the third stage of the evaluation.

27.2 Third Stage: Price and Preferential Points Assessment

27.2.1 the second stage of evaluation of the Bids will be in respect of price and preferential procurement only. Points will be allocated to Bidders at this stage of the evaluation in accordance with the PPPFA and the PPPFA Regulations, as follows:

Price points 80
Preferential procurement points 20

27.2.2 **Price points**

The following formula will be used to calculate the points for price:

$$P_s = 80(1 - (P_t - P_{min}) / P_{min})$$

Where:

P_s = Points scored for comparative price of tender or offer under consideration;

P_t = Comparative price of tender or offer under consideration; and

P_{min} = Comparative price of lowest acceptable tender or offer.

27.2.3 Preferential procurement points

A maximum of 20 points may be awarded in respect of preferential procurement, which points must be awarded to a tenderer for attaining their B-BBEE Status Level in accordance with the table below:

B-BBEE Status Level	Number of Points
1	20
2	18
3	14
4	12
5	8
6	6
7	4
8	2
Non-compliant contributor	0

An unincorporated trust, consortium or joint venture will qualify for points for their B-BBEE status level as an unincorporated entity, provided that the entity submits their consolidated B-BBEE scorecard as if they were a group structure and that such a consolidated B-BBEE scorecard is prepared for every separate Bid.

27.2.4 Total

The total points scored by each Bidder will be calculated by adding the points scored for price (out of 80) to the points scored for preferential procurement (out of 20).

The successful Bidder will be the Bidder which has the highest total points (out of 100) for both price and preferential procurement (unless there is a basis for selecting a different successful Bidder in accordance with section 2(1)(f) of the PPPFA).

PART E
TERMS OF REFERENCE & PROJECT BRIEF

1. INTRODUCTION

The Department of Mineral Resources and Energy (DMRE), National Treasury (NT) and the Development Bank of Southern Africa (DBSA) established the IPP Office (IPPO) for the specific purpose of delivering on the Independent Power Producers Procurement Programme (IPPPP) and related interventions and mandates of the DMRE.

As part of the DBSA's ongoing support to the DMRE in terms of the Memorandum of Agreement (MoA), the DBSA is requested to assist the IPPO to appointment of a service provider to design and implement new websites for the IPPO for a period of 36 months (3 years).

2. PURPOSE

The intent of this Request for Proposal (RFP) is to search for suitable service provider to redesign, structure, develop and/or migrate the content of the IPPO websites, which will result in a refreshed look and feel and that incorporates best practice in terms of content management, structure, functionality, technology, user experience, visual design and website security.

The key objectives is:

- Upgrade current Microsoft CRM 2011 to MS Dynamics 365 (on premises), without losing current website functionality.
- Enhance the IPPO websites by updating the look and feel and functionality as per the scope of work, and therefore enhancing the brand and reputation of the IPPO
- Align the website to the IPPO values, specifically:
 - High Performance - delivering a quality, effective and efficient website.
 - Service Orientation - deliver a speedy and quality user experience to our clients over multiple different viewports
 - Innovation - improving the navigation and functionality by adopting best practice in website technology and relevant technological advancements to the benefit of users.
- Enable the use of better search engine optimization (SEO) that will result in increased reach, increased session durations and lower bounce rates

3. BACKGROUND

The IPP Office currently have 6 active websites domains. These websites are integrated into Microsoft CRM 2011 for:

- Web User access and document management control; and
- Website Content Management

The development and deployment of the websites will be based on sprints, for which the IPPO will request individual quotations from the service provider. The scope of work below contains the key sprints but does not limited any future scope of works to be requested for work on MS Dynamics 365 or the websites.

The solution should therefore be scalable, and the service provider will also have to manage the MS Dynamics 365 licensing on behalf of the IPPO on an annual basis accordingly.

4. SCOPE OF WORK

4.1. Project 1 – Upgrade of CRM

- The service provider will install, configure and deploy the latest version of Microsoft CRM Dynamics on the IPPO server following required upgrade paths.
- Setup both Test & Production environment.
- Migrate the existing database and website integration to the new MS Dynamics 365 Test & Production environment.
- Must have a documented backup and recovery process for entire solution.
- Automated website back up must be configured from the webserver to the MS Dynamics 365 server for inclusion of the Tape library and/or off-site backups.

4.2. Project 2 – Upgrade of current websites

The goal of the IPPO Website is to provide simple and intuitive electronic access to information, provide a platform for demonstration of projects, and help to market the company and to provide a channel for engaging with project developers, technology and finance partners.

4.2.1. DESIGN REQUIREMENTS

The revamped design of external websites and implementation of an internal intranet site should accommodate the following:

- **Layout:** The new sites should not be visually crowded, attractively organized and structured in a manner that gives the user access to all the desired information at a glance. The sites must also be compatible with all major browsers.
- **Look and Feel:** Both sites should retain the unique look of the IPPO. This should enable the web user to recognize it as belonging to IPPO. In order to achieve brand consistency, everything visual should be inter-linked and linked back to the core brand look. The IPPO logo should be used in a consistent way across all the web/intranet pages.
- **Web Navigation Interface:** The service provider will be expected to ensure that the design of both sites is user friendly and easy to navigate. The design should anticipate and provide for different types of content. The sites content has to be organized into classifications and hierarchies.
- **Next Generation Responsiveness:** Both sites should allow websites flexibility to adjust according to the different devices the site is being accessed on.
- **Social Media Interfaces:** Both sites should allow integration of feeds from the social websites like Twitter, Instagram and face-book to allow for maximum interaction on the company social pages.
- **Access Control:** These sites should be designed in such a way to ensure that only the information to a particular user or user group is accessible. Posting capabilities should be limited only to IPPO's webmaster or authorised personnel. However, IPPO employees should be able to access the intranet, particularly when outside office via an external website. This functionality should prompt the end-user to have a recognisable username and password and utilise 2 factor authentication.

- **Search Capabilities:** An internal search engine for the website that searches the website with search results disaggregated according to key headers.
- **News Section:** News section should be incorporated into both sites' Content Management System with an archive system for old news.
- **News Feed:** The website should have the capability to receive RSS feeds (i.e. breaking news on energy articles and relevant government articles).
- **Newsletter:** The website should cater for electronic newsletter capability or compatibility.
- **Online Form & Database Application:** There should be built in functionality on the tenders and Careers pages to allow for online filling of forms.
- **Archive Section:** As appropriate, old news and other old articles should be moved to the Archives section of both sites. The service provider and the IPPO's webmaster shall agree on an archiving policy. All operations like searches and views should be available for archived information as well.
- **Emerging Media and Technologies:**
 - **Photo Gallery** – The IPPO sites should have dynamic photo galleries, these should possess some 2D viewing aspects and automatically resize photos to fit in the desired screen space allocated.
 - **Video** – Both sites should have a video library from which users can select and search for different video content the website has to offer. A page dedicated for this purpose should be developed.
 - **Podcast** – Both sites should have a provision for users to easily access podcasts.
- **External Website Links:** Provide links to other external websites as well as (e.g. the DMRE, NT & DBSA).

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
