Preface

The transformation of local government, the demarcations of new municipal boundaries and the 2000 local government elections have seen an increased interest in the information pertaining to infrastructure backlogs. The state of development information, in particular municipal infrastructure information plays a pivotal role in the interaction between DBSA and its clients. Information on access to infrastructure services on municipal level is limited.

The purpose of this document is thus to provide a statistical overview of access to infrastructure services such as electricity, water, sanitation, refuse removal services and telephones, as well as information on household income for the new demarcated municipalities.

The Municipal Demarcation Board has demarcated a total of 284 municipalities. They are divided as follows: six metropolitan municipalities (category A); 47 district municipalities (category C) and 231 local municipalities (category B).

This document comprises of four chapters. Chapter one consists of an analysis depicting the provincial situation. The second chapter provides an analysis for the metropolitan areas (Category A municipalities). The third chapter deals with information on a district municipality level, whilst the last chapter depicts information on a local municipal level. Several district management areas exist. Although District Municipalities provide the municipal functions in these areas, information has been included, for purposes of this publication, in Chapter 4.

The names of municipalities were correct as at November 2001. The primary source of information is data provided by Statistics South Africa, adapted by DBSA and supplemented by information provided by the Municipal Demarcation Board.

Total	9 077 402	3 844 030	42.3	32 514	0.4	5 200 858	57.3

Figure 1.1: South Africa: Percentage of households with access to electricity, 1996

In 1996, 57,3% of households in South Africa had an intermediate or full level of access to electricity, 0,4% had a basic level of access to electricity and 42,3% of households had a below basic access to electricity. (Table 1.1 and Figure 1.1).

Figure 1.2: South Africa: Number of households with below basic access to electricity, 1996

The Eastern Cape recorded the highest number of households with a below basic access to electricity, namely 910 388 followed by KwaZulu-Natal and the Northern Province. Only 55 051 households in the Northern Cape had a below basic access to electricity. (Table 1.1 and Figure 1.2).

Water

Table 1.2: South Africa: Access to water, 1996

Province	Total number of households	Water Service Levels							
		Below Basic		Basic		Intermediate		Full	
		Number	%	Number	%	Number	%	Number	%

North West	721 652	134 149	18.6	228 160	31.6	145 776	20.2	213 567	29.6
Gauteng	1 967 597	79 554	4.0	224 538	11.4	347 734	17.7	1 315 771	66.9
Mpumalanga	605 110	107 886	17.8	121 800	20.1	154 660	25.6	220 764	36.5
Northern Province	984 457	241 496	24.5	398 440	40.5	174 192	17.7	170 329	17.3
Total	9 077 402	1 831 414	20.2	1 766 386	19.5	1 493 116	16.4	3 986 486	43.9

The majority of households, namely 43,9% had full services. The percentage of households with an intermediate level of services amounted to 16,4%, a basic level of services attained a figure of 19,5%, whilst the percentage of households with a below basic level of services amounted to 20,2%. (Table 1.2 and Figure 1.3).

Figure 1.3: South Africa: Percentage of households with access to water, 1996

Figure 1.4: South Africa: Number of households with below basic access to water, 1996

A similar pattern to access to electricity can be detected for the number of households with below basic access to water. The Eastern Cape, Kwazulu-Natal and the Northern Province, once again, recorded the highest number of households with a below basic access to water. (Table 1.2 and Figure 1.4). Nearly half of the households in the Eastern Cape had a below basic access to water, whilst more than three quarters of the households in the Western Cape had a full level of services.

Sanitation

Table 1.3: South Africa: Access to sanitation, 1996

Province	Total number of households	Sanitation Service Levels					
		Below Basic		Basic		Intermediate/Full	
		Number	%	Number	%	Number	%
Western Cape	985 490	93 688	9.5	46 819	4.8	844 983	85.7
Eastern Cape	1 333 862	477 784	35.8	447 583	33.6	408 495	30.6

Free State	626 339	185 991	29.7	157 143	25.1	283 205	45.2
KwaZulu-Natal	1 665 299	278 515	16.7	691 014	41.5	695 770	41.8
North West	721 652	95 734	13.3	394 415	54.7	231 503	32.1
Gauteng	1 967 597	109 358	5.6	228 193	11.6	1 630 046	82.8
Mpumalanga	605 110	77 720	12.8	298 586	49.3	228 804	37.8
Northern Province	984 457	218 531	22.2	635 855	64.6	130 071	13.2
Total	9 077 402	1 591 844	17.5	2 920 953	32.2	4 564 605	50.3

Just over half of the households in South Africa (50,3%) had access to an intermediate or full level of sanitation services, followed by 32,3% with access to a basic level of services and 17,5% with a below basic level of services. (Table 1.3 and Figure 1.5).

Figure 1.5: South Africa: Percentage of households with access to sanitation, 1996

More than a third of the households (477 784) in the Eastern Cape had a below basic level of services, followed by Kwazulu-Natal with 278 515. Provinces recording an access rate of above 80% for a full level of services included the Western Cape and Gauteng with 85,7% and 82,8% respectively. (Table 1.3 and Figure 1.5).

Figure 1.6: South Africa: Number of households with below basic access to sanitation, 1996

Refuse

Table 1.4: South Africa: Access to refuse removal facilities, 1996

Province	Total number of households	Refuse removal service level			
		Below Basic/basic		Intermediate / Full	
		Number	%	Number	%
Western Cape	985 490	151 364	15.4	834 126	84.6
Eastern Cape	1 333 862	859 838	64.5	474 024	35.5
Northern Cape	187 596	57 136	30.5	130 460	69.5
Free State	626 339	222 507	35.5	403 832	64.5
KwaZulu-Natal	1 665 299	946 842	56.9	718 457	43.1
North West	721 652	462 925	64.1	258 727	35.9
Gauteng	1 967 597	294 275	15.0	1 673 322	85.0
Mpumalanga	605 110	365 906	60.5	239 204	39.5
Northern Province	984 457	865 954	88.0	118 503	12.0
Total	9 077 402	4 226 747	46.6	4 850 655	53.4

There was an almost equal split between the percentage of households with an intermediate or full level of refuse removal services and households with a below basic or basic level of services. (Table 1.4 and Figure 1.7).

Figure 1.7: South Africa: Percentage of households with access to refuse removal facilities, 1996

Kwazulu-Natal had the most number of households with a below basic or basic level of refuse removal services, followed by the Eastern Cape and the Northern Province. Only 12% of the households in the Northern Province had access to an intermediate or full level of services. (Table 1.4 and Figure 1.8).

Figure 1.8: South Africa: Number of households with below basic/basic access to refuse removal facilities, 1996

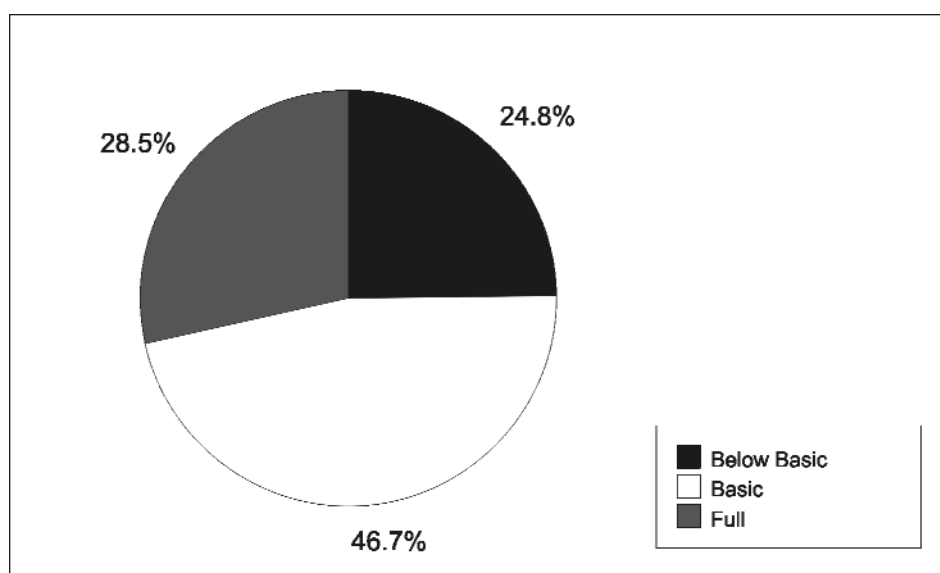

Telephones

Table 1.5: South Africa: Access to telephones, 1996

Province	Total number of households	Telephone Service Levels					
		Below Basic		Basic		Intermediate/Full	
		Number	%	Number	%	Number	%
Western Cape	985 490	44 780	4.5	398 291	40.4	542 419	55.0
Eastern Cape	1 333 862	692 709	51.9	433 828	32.5	207 325	15.5

Mpumalanga	605 110	130 170	21.5	364 881	60.3	110 059	18.2
Northern Province	984 457	437 423	44.4	474 083	48.2	72 951	7.4
Total	9 077 402	2 247 044	24.8	4 239 125	46.7	2 591 233	28.5

During 1996, some 28,5% of the households in South Africa had access to a full level of services, 46,7% had a basic access and 24,8% had a below basic access to telephones. (Table 1.5 and Figure 1.9).

Figure 1.9: South Africa: Percentage of households with access to telephones, 1996

Almost 700 000 households (51,9%) in the Eastern Cape had a below access to telephones, followed by Kwazulu-Natal with 471 000 (28,3%) and the Northern Province with 438 000 (44,4%). In the Western Cape only 45 000 households (4,5%) had a below basic access to telephones. (Table 1.5 and Figure 1.10).

Figure 1.10: South Africa: Number of households with below basic access to telephones, 1996

Household income

Almost half of the households in South Africa earned less than R6 000 per annum in 1996 and only 31,1% earned more than R18 000 per annum. (Table 1.6 and Figure 1.11).

Figure 1.11: South Africa: Percentage of households per income category, 1996

Kwazulu-Natal had the most number of households that earned less than R6 000 per annum, followed closely by the Eastern Cape and Gauteng. More than half of the households in the Western Cape earned more than R18 000 per annum, compared to the Northern Province where only 15,8% earned more than R18 000 per annum. (Table 1.6 and Figure 1.12).

Figure 1.12: South Africa: Number of households with below R6 000 income per annum, 1996

Chapter 2: Metropolitan municipality review

Electricity

Table 2.1: Metropolitan municipalities: Access to electricity, 1996

Municipality	Total number of households	Electricity Service Levels					
		Below Basic		Basic		Intermediate / Full	
		Number	%	Number	%	Number	%
City of Cape Town	653 099	86 291	13.2	1 555	0.2	565 253	86.5
Ethekwini	646 958	169 714	26.2	2 414	0.4	474 830	73.4
Ekurhuleni	543 122	137 585	25.3	808	0.1	404 729	74.5
City of Johannesburg	733 955	110 349	15.0	1 072	0.1	622 534	84.8
Nelson Mandela	225 933	65 812	29.1	384	0.2	159 737	70.7
City of Tshwane	426 459	91 375	21.4	864	0.2	334 220	78.4
Total	3 229 526	661 126	20.5	7 097	0.2	2 561 303	79.3

On average, 79,3% of households in metropolitan areas had access to a full level of electricity services. The percentage of households with full access varied from 86,5% in the case of the City of Cape Town to 70,7% in the case of Nelson Mandela Metropolitan Municipality. (Table 2.1 and Figure 2.1).

Figure 2.1: Metropolitan municipalities: Percentage of households with access to electricity, 1996

Ethekwini Municipality had the highest number of households with a below basic level of services, namely 169 714, followed by Ekurhuleni. The City of Cape Town only recorded a below basic level of services of 13,2%. (Table 2.1 and Figure 2.2).

Figure 2.2: Metropolitan municipalities: Number of households with below basic access to electricity, 1996

Water

The percentage of households in Metropolitan municipalities who had a below basic access to water, amounted to only 3,7%, with 68,4% being the average for a full level of services. Some 14,1% of households used water supplied by public taps (basic level). (Table 2.1 and Figure 2.3).

Figure 2.3: Metropolitan municipalities: Percentage of households with access to water, 1996

Figure 2.4: Metropolitan municipalities: Number of households with below basic access to water, 1996

As was the case with electricity, Ethekwini Municipality once again recorded the highest number of households with a below basic level of services, namely 38 724 households or 6,0%. The percentage of households with a below basic level of services varied between 2,2% and 6,0%. (Table 2.1 and Figure 2.4).

Sanitation

Table 2.3: Metropolitan municipalities: Access to sanitation, 1996

Municipality	Total number of households	Sanitation Service Levels

Metropolitan municipalities are well endowed with sanitation facilities, with 80,5% of households having a full level of services and only 6,3% having a below basic level of services. Another 13,2% had a basic level of services. (Table 2.3 and Figure 2.5).

Figure 2.5: Metropolitan municipalities: Percentage of households with access to sanitation, 1996

The City of Cape Town headed up the list of municipalities with the most number of households with a below basic access to sanitation services with 54 434 households, followed closely by the City of Johannesburg with 48 994 households. The City of Tshwane had the least number of households with a below basic access, namely 7 941, representing only 1,9% of the households. (Table 2.3 and Figure 2.6).

Figure 2.6: Metropolitan municipalities: Number of households with below basic access to sanitation, 1996

Refuse

Table 2.4: Metropolitan municipalities: Access to refuse removal facilities, 1996

Municipality	Total number of households	Refuse Service Levels			
		Below Basic / Basic		Intermediate / Full	
		Number	%	Number	%
City of Cape Town	653 099	53 741	8.2	599 358	91.8
Ethekwini	646 958	201 677	31.2	445 281	68.8
Ekurhuleni	543 122	67 634	12.5	475 488	87.5

Nelson Mandela	225 933	17 716	7.8	208 217	92.2
City of Tshwane	426 459	94 752	22.2	331 707	77.8
Total	3 229 526	493 699	15.3	2 735 827	84.7

The majority of households, namely 2,7 million had access to an intermediate or full level of services. This represented 84,7% of the total number of households. Only 15,3% of the metropolitan households recorded a below basic or basic access to refuse removal facilities. (Table 2.4 and Figure 2.7).

Figure 2.7: Metropolitan municipalities: Percentage of households with access to refuse removal facilities, 1996

Figure 2.8: Metropolitan municipalities: Number of households with below basic/basic access to refuse removal facilities, 1996

Ethekwini Municipality recorded the highest number of households with a below basic or basic access to refuse removal facilities, namely 201 677, followed by the City of Tshwane. Three of the six metropolitan Municipalities had a below basic or basic access rate of less than 10%. (Table 2.4 and Figure 2.8).

Telephones

Table 2.5: Metropolitan municipalities: Access to telephones, 1996

Municipality	Total number of households	Telephone Service Levels					
		Below Basic		Basic		Intermediate / Full	
		Number	%	Number	%	Number	%
City of Cape Town	653 099	19 887	3.0	233 963	35.8	399 249	61.1

City of Tshwane	426 459	31 135	7.3	176 328	41.3	218 996	51.4
Total	3 229 526	196 580	6.1	1 465 633	45.4	1 567 313	48.5

Almost half of the metropolitan households had access to a full level of services, i.e. a telephone in the dwelling, whilst an almost equal percentage of households had a basic level of access to telephones (48,5% vs 45,4%). Only 6,1% of metropolitan households had a below basic level of services. (Table 2.5 and Figure 2.9).

Figure 2.9: Metropolitan municipalities: Percentage of households with access to telephones, 1996

The number of households with a below basic access to telephone services varied between 12 575 and 49 869. This represented only between 5,6% and 7,7% of the total number of households. The City of Cape Town had the most number of households with a full level of service, namely almost 400 000 households or 61,1%. (Table 2.5 and Figure 2.10).

Figure 2.10: Metropolitan municipalities: Number of households with below basic access to telephones, 1996

Household income

Table 2.6: Metropolitan municipalities: Number of households per income category, 1996

Municipality	Total number of households	Income Levels							
		R0 to R6 000		R6 001 to R12 000		R12 001 to R18 000		R18 001 and more	
		Number	%	Number	%	Number	%	Number	%
City of Cape Town	653 085	171 700	26.3	55 253	8.5	64 928	9.9	361 204	55.3

One third (33,3%) of the metropolitan households earned less than R6 000 per annum. This compared favourably to that of South Africa where 46,6% of the households earned less than R6 000 per annum. Similarly, the percentage of households who earned more than R18 000 per annum was considerably higher than the national average of 31,1%. (Table 2.6 and Figure 2.11).

Figure 2.11: Metropolitan municipalities: Percentage of households per income category, 1996

Figure 2.12: Metropolitan municipalities: Number of households with income below R6 000 per annum, 1996

In terms of absolute numbers, the City of Johannesburg had the most number of households with an income of less than R6 000 per annum, namely 264 289 households. Percentage wise some 37,9% households in Nelson Mandela Metropolitan Municipality earned less than R6 000 per annum. (Table 2.6 and Figure 2.12).

Chapter 3: District municipality review

More than half of the households (54,4%) in District Municipalities had a below basic access to electricity. Households with intermediate or full access to electricity numbered 45,1%, while 0,4% of households used electricity supplied by a source other than an authority. (Table 3.1 and Figure 3.1).

Figure 3.1: District municipalities: Percentage of households with access to electricity, 1996

In terms of the number of households that had a below basic access to electricity, DC15 (OR Tambo) and DC12 (Amatole) ranked first and second. DC44 (Alfred Nzo) had the highest percentage of households with a below basic access to electricity, namely 94,4%, followed by DC15 (OR Tambo) with 90,4%. It is interesting to note that all the district municipalities located in the Western Cape recorded intermediate or full level of services higher than 75%. (Table 3.1 and Figure 3.3).

Water service levels are divided into four levels, namely, below basic, basic, intermediate and full level. In the district municipalities as a whole, 30,4 % of the households had a full level of services, 17,9% had an intermediate level of services, 22,4% had a basic level of services and 29,3% had a below basic level of services. (Table 3.2 and Figure 3.3).

Figure 3.3: District municipalities: Percentage of households with access to water, 1996

With regards to the number of households with a below basic level of services in district municipalities, DC15 (OR Tambo) and DC12 (Amatole), once again, occupied the worst two positions with 242 273 and 141 234 of households respectively. DC15 (OR Tambo) also recorded the second highest percentage of households with a below basic access to water. In DC27 (Umkhanyakude) 82,4% of households had a below basic access to water. (Table 3.2 and Figure 3.4).

Figure 3.4: District municipalities: Number of households with below basic access to water, 1996

Sanitation

Table 3.3: District municipalities: Access to sanitation, 1996

Just over a third (33,6%) of the households in district municipalities had intermediate or full level of services to sanitation facilities and almost a quarter (23,7%) had a below basic level of services. Some 42,7% had basic access to pit latrines. (Table 3.3 and Figure 3.5).

Figure 3.5: District municipalities: Percentage of households with access to sanitation, 1996

The rankings established in terms of a below basic access to electricity and water are also reflected with regards to a below basic access to sanitation. The highest number of households with below basic access to sanitation is located in three Eastern Cape district municipalities, namely DC15 (OR Tambo), DC12 (Amatole) and DC13 (Chris Hani). The highest percentage of households with a below basic access was recorded in DC27 (Umkhanyakude) located in Kwazulu-Natal, namely 64,6%. In DC44 (Alfred Nzo) only 1,4% of the households had access to an intermediate or a full level of services. (Table 3.3 and Figure 3.6).

Figure 3.6: District municipalities: Number of households with below basic access to sanitation, 1996

Refuse removal facilities have been divided into two main categories, namely a below basic or basic access and an intermediate or full level of services. The refuse of some 36,2% of households in district municipalities were removed by a local authority, whilst 63,8% of the households had a below basic or basic access to refuse removal services. (Table 3.4 and Figure 3.7).

Figure 3.7: District municipalities: Percentage of households with access to refuse removal facilities, 1996

Areas where the number of households with a below basic or basic access to refuse removal facilities exceeded the 200 000 mark included DC15 (OR Tambo) and DC12 (Amatole). In DC44 (Alfred Nzo) only 1,9% of the households had access to an intermediate or full level of services, followed by DC27 (Umkhanyakude) with 4,2%. CBDC8 (West Rand) was the only district municipality that attained an intermediate or full level of services rate above 80%. (Table 3.4 and Figure 3.8).

Figure 3.8: District municipalities: Number of households with below basic/basic access to refuse removal facilities, 1996

Telephones

Only 17,5% of households in district municipalities had intermediate or full access to telephone services. Almost half of the households had a basic access which included access to a public phone, whilst 35,1% had a below basic access. (Table 3.5 and Figure 3.9)

Figure 3.9: District municipalities: Percentage of households with access to telephones, 1996

In terms of the number of households with a below basic access to telephones, DC15 (OR Tambo) and DC12 (Amatole) ranked first and second. Some 246 826 households in DC15 (OR Tambo) had a below basic access, followed by DC12 (Amatole) with 169 550 of households. District municipalities in the Eastern Cape occupied the first three places in terms of the highest number of households with a below basic access to telephones. Less than 1% of the households in DC44 (Alfred Nzo) had telephones in the dwelling or access to a cellular phone. (Table 3.5 and Figure 3.10).

More than half (54%) of the households in district municipalities earned less than R6 000 per annum, with less than a quarter (22,6%) earning more than R18 000 per annum. The percentage of households that earned between R6 000 and R18 000 per annum comprised the rest, namely 23,4%. (Table 3.6 and Figure 3.11).

Figure 3.11: District municipalities: Percentage of households per income category, 1996

Not surprisingly, the rankings in terms of household income followed the same pattern as was the case with below basic access to services. DC15 (OR Tambo) and DC12 (Amatole) once again occupied the worst positions in terms of the number of households that earned less than R6 000 per annum, namely 205 126 and 198 225 households respectively. Some 71,9% of the households in DC44 (Alfred Nzo) earned less than R6 000 per annum. The district municipalities in the Western Cape recorded the lowest percentage of households with income less than R6 000 per annum. (Table 3.6 and Figure 3.12).

Figure 3.12: District municipalities: Number of households with income below R6 000 per annum, 1996

Chapter 4: Local municipality review

Electricity

EC 125 (Buffalo City) recorded the highest number of households with a below basic access to electricity, namely 80 624. In terms of percentages, KZ286 (Nkandla) ranked worst where 98,7% of the households had a below basic access to electricity. Of the 231 local municipalities, 110 attained a below basic access percentage of 50% or higher. In WC024 (Stellenbosch) municipality 89,5% of the households had a full level of services. (Table 4.1).

In five local municipalities, 50 000 or more households had a below basic access to water, with EC052b (Umzimvubu) local municipality recording the highest figure of 64 380 households. When comparing the number of municipalities with below basic access to water with below basic access to electricity, fewer municipalities recorded a percentage access to water higher than 50%. Households in KZ294 (Maphumulo) municipality ranked worst in terms of the percentage below basic access to water. Almost three quarters of the households in WC024 (Stellenbosch) and WC014 (Saldanha Bay) had a full level of access. (Table 4.2).

Sanitation

The highest number of households with a below basic access to sanitation is located in EC121 (Mbashe) local municipality. Five local municipalities exist where more than three quarters of the households have a below basic access to sanitation facilities. Close to 80% of the households in KZ273 (The Big 5 False Bay) municipality had below basic access to sanitation facilities. The only municipality where more than 90% of the households had access to a full level of services was WC014 (Saldanha Bay) 92,5%.

Refuse

Some 107 502 households in CBLC6 (Buschbuckridge) municipality had a below basic or basic access to refuse removal services. In 89 municipalities more than three quarters of the households had to make provision for their own refuse removal facilities, whilst in 15 municipalities 99% or more of the households had a below basic or basic level of services. The two municipalities where more than 90% of the households had access to a full level of services included NC091 (Sol Plaatjie) and WC014 (Saldanha Bay). (Table 4.4).

Telephones

Most households with a below basic access to telephones are located in EC05b2 (Umzimvubu) municipality, (73 666). Ten municipalities in the Eastern Cape ranked worst in terms of the percentage of households with below basic access to telephones. EC152 (Ntabankulu) topped the list with 93,2%. Only four municipalities recorded full access levels of higher than 50%, namely GT422 (Midvaal), WC024 (Stellenbosch), WC033 (Cape Agulhas) and WC032 (Overstrand). (Table 4.5).
