

<u>Item No</u>	<u>Quantity</u>	<u>Rate</u>	<u>Amount</u>
<b><u>SECTION No. 1</u></b>			
<b><u>BILL No. 1</u></b>			
<b><u>PRELIMINARIES</u></b>			
<b><u>BUILDING AGREEMENT AND PRELIMINARIES</u></b>			
i)			
The <b>agreement</b> is to be the JBCC Series 2000 Principal Building Agreement, Edition 4.1 March 2005, and other contract documents that together form the contract between the employer and contractor			
ii)			
The <b>preliminaries</b> are to be the JBCC Series 2000 Code 2103 Preliminaries prepared by the Joint Building Contracts Committee, May 2005 edition and shall be deemed to be incorporated herein			
iii)			
Tenderers are referred to the abovementioned documents for the full intent and meaning of each clause thereof (hereinafter referred to by heading and clause number only) for which such allowance must be made as may be considered necessary			
iv)			
Where standard clauses or alternatives are not entirely applicable to this contract such modifications, corrections or supplements as will apply are given under each relevant clause heading			
v)			
Where any item is not relevant to this specific contract such item is marked N/A (signifying "not applicable")			
<b><u>PREAMBLES FOR TRADES</u></b>			
The Model Preambles for Trades (2008 edition) as published by the Association of South African Quantity Surveyors shall be deemed to be incorporated in these bills of quantities and no claims arising from brevity of description of items fully described in the said Model Preambles will be entertained			
Supplementary preambles are incorporated in these bills of quantities to satisfy the requirements of this project. Such supplementary preambles shall take precedence over the provisions of the said Model Preambles			
<b>Carried to Collection</b>			R
Section No. 1 Bill No. 1 Preliminaries			
SEPTEMBER 2022			

The contractor's prices for all items throughout these bills of quantities must take account of and include for all of the obligations, requirements and specifications given in the said Model Preambles and in any supplementary preambles

**PRICING OF PRELIMINARIES**

If Alternative A as set out in clause B10.3 hereinafter is to be used for the adjustment of the preliminaries each item priced is to be allocated to one or more of the three categories, where  
 "F" denotes a fixed amount (amount not to be varied),  
 "V" denotes an amount variable in proportion to value and  
 "T" denotes an amount in proportion to time

7 Compliance with regulations (clause 7)

Without limiting the generality of the provisions of Clause 7.0, the contractor's attention is drawn to the provisions of the Construction Regulations, 2014 issued in terms of the Occupational Health and Safety Act, 1993 and Part C4.2 (Annexure C) of this tender document. It is specifically stated that the employer shall prepare a documented health and safety specification for the works and that the employer shall ensure that the contractor has made provision for the cost of health and safety measures during the execution of the works. The contractor must also comply with all Covid-19 regulations and protocols. The contractor shall price opposite this item for compliance with the act and the regulations and the reasonable provisions of the aforementioned health and safety specifications.

Asbestos removal.  
The Contractor must make provision in his price for the appointment of a independent qualified certified and registered asbestos inspector to evaluate and monitor the removal of any asbestos material encountered in the course of the works.

The Contractor shall provide a breakdown of the price against the following items:

(a) : Contractor's initial obligations in respect of the Occupational Health and Safety Act and Construction Regulations R\_\_\_\_\_

(b) : Contractor's time related obligations in respect of the Occupational Health and Safety Act and Construction Regulations R\_\_\_\_\_

(c) : Provision of a part time / full time (delete as applicable) Construction Safety Officer R\_\_\_\_\_

(d) : Asbestos inspector R \_\_\_\_\_

Pretreatment of timber

All timber including scaffolding, formwork, etc. used on site shall be free of borer or other beetle and termite infection. All permanent softwood fixed in buildings shall be treated against borer, etc. in accordance with Government Notice R451 of 1969-03-28 using Class B or C preservative. The type of preservative used shall be appropriate to the use of the timber. Any prescribed treatment shall comply with SABS 05

When treated timbers are cut, the cut surfaces shall be effectively brushed with at least two coats of preservative solution.

Decorative laminate finish:

Laminate finish shall be glued under pressure. Edge strips shall be butt jointed at junctions with adjacent similar finish

-----

**PREFABRICATED METAL CONNECTED TIMBER ROOF TRUSSES**

**GENERAL**

**TIMBER AND METAL CONNECTOR PLATES**

Prefabricated Timber Roof Trusses are based on SANS 10160, 10163 & 10243 and connected with an accredited Engineering System's nail plates as per their design and supplied by an accredited ITC-SA Fabricator

**TRUSS CONNECTION**

The trusses shall be constructed with jigs specially designed to provide correct cambers and pitches.

All joints are to be close fitted butt joints and made by precision pressing of the metal connector plate into each side of the joint

**TRUSS LOADING**

The dead load of the trusses shall be to accommodate metal roof sheeting on 50 x 75mm SA Pine battens, a 9mm skimmed gypsum and / or 6mm fibre cement board ceiling nailed on 38 x 50mm brandering at 300 or 600mm centres in one direction, 135mm thick thermal insulation and Sisalation FR420 Fire Retardant grade aluminium foil based insulation

**Carried to Collection**

Section No. 2  
Bill No. 7  
Carpentry and Joinery

SEPTEMBER 2022

R

**TRUSS DESIGN**

All trusses shall be designed by a Registered Professional Engineer (in accordance with the SABS Code of Practices for the Design of Timber Structures)

In designing all the trusses, etc., note must be taken of the adverse weather conditions which prevail from time to time in the area in which they are to be erected

**TRUSS SPACING**

The truss centres shall be as described in the Bills of Quantities for each respective truss type, or such other truss centres specified on the engineer's or fabricator's drawings

**TRUSS PITCH**

The truss pitch shall be as described in the Bills of Quantities for each respective truss type

**PREFABRICATED ENGINEERED ROOF TRUSSES**

*Prefabricated timber roof construction complete (including battens and/or purlins, wall plates, bearers, bracing, etc.) designed, constructed, delivered and erected by an approved firm of specialists, under a written guarantee. Both the design and design guarantee shall be lodged with the project manager for approval before the work is commenced. Once erected an erection certificate shall be supplied to the Project Manager (Refer to drawings annexed to these bills of quantities)*

**Supply, fabricate and deliver to site of roof structure**

*Engineer's Certificate*

1	Provide an engineer's certificate covering the design of the plate nailed timber roof structure to all three sections	No	1.00

<p><b><u>SECTION No. 2</u></b></p>			
<p><b><u>BILL No. 13</u></b></p>			
<p><b><u>TILING</u></b></p>			
<p>NOTE : The Contractor is referred to the Model Preambles (2008 Edition) as issued by the Association of South African Quantity Surveyors before pricing this bill</p>			
<p><b><u>ADHESIVE SYSTEM</u></b></p>			
<p>(TAL) Allow all new concrete work and screeds to cure for at least 28 days before proceeding. All new concrete work and screeds must have a moisture content of 5% or less before tiling can be commenced. All screeds must be firmly attached to the underlying concrete, must be integrally sound and must be of a quality and consistency suitable for tiling. All defective areas must be removed and the floor made good before proceeding. Apply TAL Gold Star 6 rapid setting adhesive mixed 20kg with 5 litres of TAL Bond (replacing the water in the mix) using a notched TAL floor Trowel. Grout with TAL Fine Epoxy grout.</p>			
<p>Full body porcelain tiles (colour by architect), size 300 x 300mm, fixed to internal floor screed with TAL Professional tile adhesive mixed with TAL Bond® in lieu of water applied with a notched trowel to provide a solid adhesive bed of 5-6 mm. No voids should be left in the system. Adhesive should not be allowed to dry before application of tiles. Joints continuous in both directions and grouted with TAL tile grout (elsewhere specified), excess grout on the surface to be cleaned with water as work proceeds.</p>			
<p>All preparatory work and applications must be done in accordance with the manufacturers specifications and rates must include for this</p>			
<p><b><u>MOVEMENT JOINTS</u></b></p>			
<p>Suitable movement joints should be located at maximum 4,5 m centres in both directions, horizontally and vertically and within 1 m of all horizontal and vertical corners and against any obstructions fixed to the structural background.</p>			
<p><b>Carried to Collection</b></p>		R	
<p>Section No. 2 Bill No. 13 Tiling</p>

Section No. 4  
Bill No. 1  
General

SEPTEMBER 2022

4	Supply and install a 100A Single Phase kWh meter with program that has been approved by the local supply authorities, program includes all auxiliaries (CT, VT, etc.)	No	1	
5	Construct a new separate earth mat installed at the building edge natural ground level (1.5m). The earth mat will consist of 70mm copper bars and will cover an area of at least 2m x 2m. The bars will form a grid of 400mm x 400mm. All connections will be made using two round solid copper bars of 70mm <sup>2</sup> (the tails) from the mat connected to the Main DB earth bars. The tails will be connected to the mat with a distance more than 1m apart. The mat will be connected into a separate York box at the mat and connected to the Main DB.	No	1	
<b><u>DISTRIBUTION BOARDS</u></b>				
<i>Supply and install Sub distribution boards (1.6mm 3CR12 sheet powder coated - white), complete with sheet metal trays, frames, busbars, provision for additional 30% space, legend cards, circuit breakers (Hydraulic Magnetic), switches, relays, earth leakage units, etc. detailed on the schematic wiring diagrams.</i>				
6	<b>Main Kiosk</b>	No	1	
7	100A 2 Pole 25kA Circuit Breaker.	No	1	
8	50A 2 Pole 10kA Circuit Breaker.	No	1	
9	30A 2 Pole 10kA Circuit Breaker.	No	3	
<b>Carried to Collection</b>				
Section No. 4 Bill No. 1 General				
SEPTEMBER 2022				
				R

10	20A 2 Pole 10kA Circuit Breaker.	No	2		
11	1 Phase + N Class 2 surge protection	No	1		
12	Install 100A Single Phase kWh meter (See Item 1.4)	No	1		
	<b><u>LV CABLES</u></b>				
	<i>All cables to be installed as per specifications, fastened to walls, etc. 3 and 4 Core PVC insulated PVC bedded SWA PVC sheathed SANS 1507-3</i>				
	<b><u>35mm<sup>2</sup> 3 Core Copper cable.</u></b>				
13	Supply cable from Municipal Pole to DB-Ground	m	45		
14	35mm <sup>2</sup> BCC Earth conductor for above	m	45		
	<b><u>16mm<sup>2</sup> 3 Core Copper cable.</u></b>				
15	Supply cable from Main Kiosk to DB-3 Classroom block	m	152		
16	Supply cable from Main Kiosk to DB- Ablution 1 & 2	m	82		
17	16mm <sup>2</sup> BCC Earth conductor for above	m	234		
	<b><u>10mm<sup>2</sup> 3 Core Copper cable.</u></b>

General					
SEPTEMBER 2022					

	<b><u>MAN HOLES</u></b>			
37	Install manholes as per specifications.	No	17	
	<b><u>EXCAVATIONS</u></b>			
38	Excavate trenching 700mm deep for cable and sleeves in pick-Import virgin soil of 100mm below and above cable. Install cabl 100mm above cable. Backfill and compact. Make neat.	m	450	
39	Excavate trenching 700mm deep for cable and sleeves in non pic (Jack hammer). Import virgin soil of 100mm below and above cable warning tpe 100mm above cable. Backfill and compact.	m	55	
40	Excavate trenching 700mm deep and 3m in length for locating services in pick-able soil. Backfill and compact. Make neat.	No	20	
	<b><u>ELECTRICAL CONNECTION</u></b>			
41	Allow to arrange for the isolation of the electrical supply of the new kiosks and connect new cables.	No	1	
	<b><u>FIBRE OPTIC &amp; DATA INSTALLATION</u></b>			
42	Cat5 networking cable, including splicing etc.	m	120	
	<b>Carried to Collection</b>			R
	Section No. 4			
	Bill No. 1			
	General			
	SEPTEMBER 2022			

**GENERAL / TESTING AND COMMISSIONING**

52	Allow for Certificate of Compliance for each building in terms of Occupational and Health Safety Act, OSHACT of 1993.	No	1	
53	Compliance with OH SACT : Compiling and implementing of Safe issuing of safety clothes, shoes, gloves etc, as required.			SUM
54	Labelling of all circuits and draw boxes with permanent screw as described in Project Detailed Specifications.			SUM
55	Allow for testing, balancing of Phases and commissioning of the electrical installation - lighting and power			SUM
56	Allow for providing detailed manuals and marked up drawings services installation to the Engineer			SUM
57	Supply and install 35mm locally manufactured padlocks and lock well as master keys.(3 sets) with purpose-made pvc labels to loc all DB's, SDB's and lockable draw boxes.	No	5	
	<b><u>CHASE AND MAKE NEAT</u></b>			
58	Chase, install conduit and plaster. Make neat	m	350
