

- ADDITIONAL NOTES**
1. All exposed concrete slabs and beams bearing on brickwork to have a slip joint made up of 2 sheets of massonite with smooth faces abutting each other at top of brick – concrete interface.
  2. Special attention to be given to curing of concrete. Exact details to be discussed with the Engineer on site prior to pouring of any concrete.
  3. Two lintels plus five courses of brickwork to be built over all openings – reinforced every course with brickforce.

BAR SCALE

[illegible]
