*Company Details:*

*Business Representative:*

*Email Address:*

*Telephone No:*

## 3 QUESTION PROCESS

Please Post Questions on the **Q & A tab loaded to this meeting**, Answers will be emailed to all bidders after session.

## 4 TENDER BRIEF

- Pre-qualify contractors
- Responsiveness Pre-qualifiers are important
- Functionality will form part of evaluations
- Risk Analysis will form part of the evaluations

## 5. TENDER INFORMATION

- For this project a Two-Phase procurement procedure will be adopted:
- **PHASE 1: EXPRESSION OF INTEREST (EOI)**
- The first phase will be based on information submitted with this EOI document.
- Tenderers who wish to qualify to be issued with a Phase 2 tender document must:
- Meet all stipulated criteria as defined in the applicable evaluation stages.
- **PHASE 2: REQUEST FOR PRICE (RFP)**
- The Tender Documents for Phase 2 will only be supplied to the shortlisted/qualifying bidders after the EOI process.
- This document will contain pricing data, a bill of quantities, the agreement, contract data, and specifications.
- Bidders will be assessed on Price & Preference, Risk and Other Objective Criteria, to conclude in recommendation.

## 5. TENDER INFORMATION CONTINUED.....

- The purpose of the pre-qualification process is to invite Contractors to pre-qualify for the proposed alterations, demolitions, and refurbishment of the Nandoni water treatment works, in Limpopo
- Potential contractors are required to undergo a pre-qualification process that is designed to provide DBSA with information to assist in the selection of potential contractors to tender for the works. The pre-qualification will be evaluated in accordance with DBSA's procedures. DBSA intends that those who have adequately demonstrated that they have sufficient financial, economic, technical capacity, experience and ability to execute the project, be included in the Phase 2 tender process. The information requested will assist DBSA in assessing each Contractor's capabilities.

## 6. PROJECT BRIEF

### COMPLEX WORK

- Connect to existing works without affecting production, through planned shutdowns,
- Integrate with existing services tunnel (1.2m ND)
- Re-route new raw water feed line (1m ND),
- Integration of existing control system, HMI, with new SCADA
- Large pumps, large motors (650kW, 500kW, 200kW), large valves and fittings, long lead
- Large filtration plant

### ▪ PROJECT RISK AND EXAMPLES

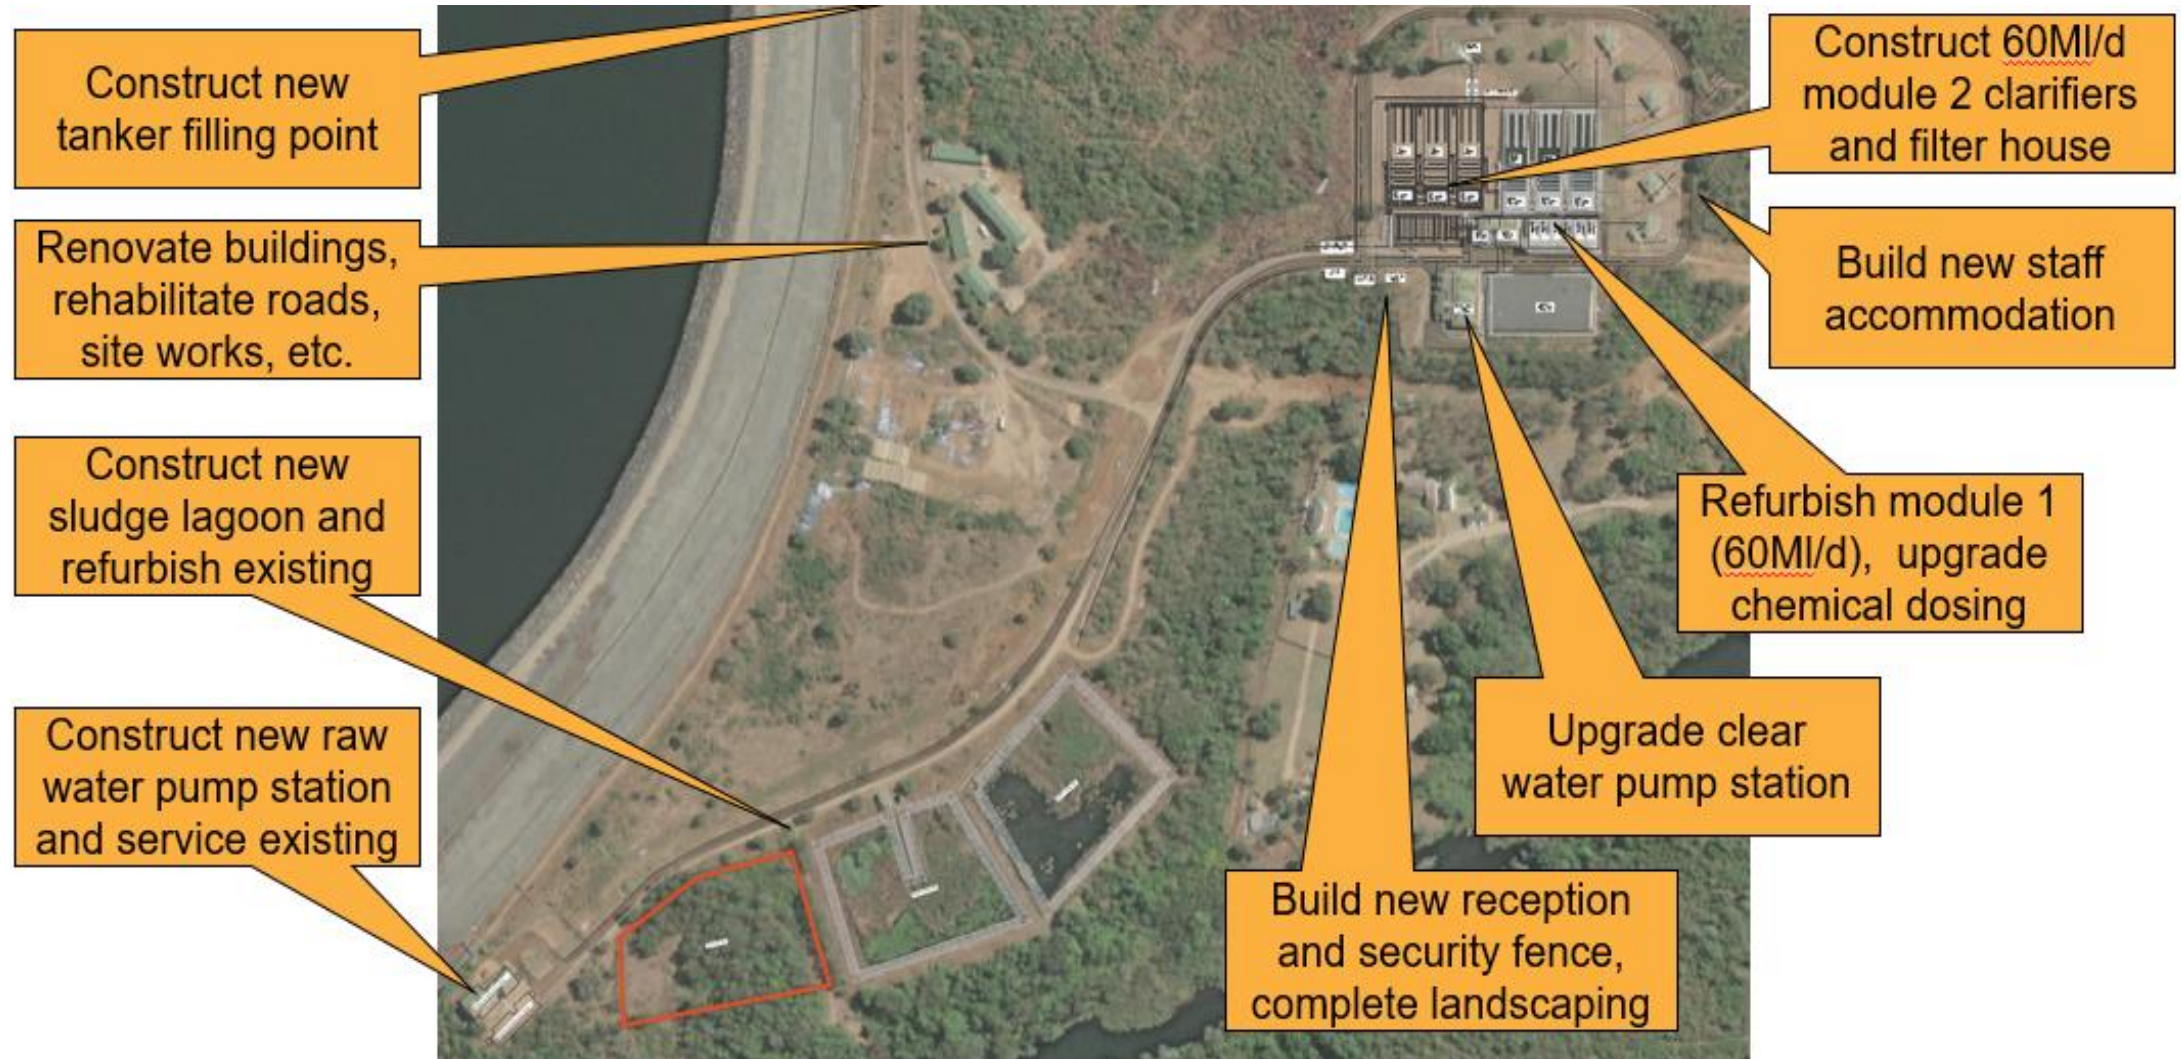

- Gneiss rock base – require blasting in vicinity of existing structures for clarifier hopper and others
- Water supply is a sensitive matter, and violent protests, disruptions can be expected
- Sludge ponds require refurbishment, but host a crocodile or more ...
- Occupational Health and Safety / Construction Regulations 2014
- Water Use Licence Application ongoing

## ***PROJECT BRIEF CONTINUED...***

### ■ **Client expectations**

- Fast track progress, construction in 2 years, refurbishment in 1 year, penalties
- Rock excavated on site to be crushed for concrete, other stone / rock requirements
- Contract participation, local labour, skills transfer, etc.
- No compromise on quality
