- NOTES
- This drawing is copyright, reserved and remains the property of R&D Architecture Pty Ltd.
- Prior to any demolition work, the architect, heritage consultant & contractor are to identify & mark buildings of heritage value.
  - The contractor is to supply the architect & heritage consultant with a detailed proposal discussing how buildings will be cleaned, demolished and components stored for re-use. (where applicable)
  - Once the contractor has completed the bulk earthworks, final platforms are to be surveyed and information forwarded to the architect & structural engineers for approval.
  - All structural work is to Structural Engineers detail and specification.
  - All internal road dimensions, road center lines, maneuvering spacing, turning circle and kerb radii are to Civil Engineers Detail. See Drawing Attached by ..... ENGINEERS.
  - All bulk earthwork details, cut & fill values are to Civil Engineers Detail: See Drawing Attached by ..... CONSULTING ENGINEERS.
  - All storm water attenuation measures and sewer reticulation is to Civil engineers Detail: See Drawing Attached by ..... CONSULTING ENGINEERS.
  - All positioning of electrical metering units, mini substations, distribution kiosks & capacity requirements are to Electrical Engineers Detail: See Drawing Attached by ..... CONSULTING ENGINEERS.
