

RFP 198/2024 – COMPLULASORY - BRIEFING MEETING: QUESTIONS AND RESPONSES

Item no.	Category	Question	Response
1	SCM/Technical	In the Technical Scorecard, Section 1.1 refers to one key resource, while Section 3.1 mentions team members. Could you please clarify the maximum number of team members that can be included in the submission, or is it at the bidder's discretion?	Given the multidisciplinary nature of the work, it is expected that a team with diverse expertise will collaborate to deliver the project, rather than relying on a single individual to manage all aspects. There is no fixed limit on the number of team members; the composition is at the bidder's discretion. However, as this is a competitive bidding process, bidders should carefully consider the balance between team composition and cost. A balanced approach that optimizes both expertise and cost-efficiency is advisable.
2	SCM/Technical	If more than one resource is required for the project, Section 10 of the Pricing Schedule specifies one hourly rate per deliverable. Given that a team will consist of multiple members with varying rates, could we use a global rate for calculating the final pricing instead?	It is up to the bidder to determine which scale to use. This is a competitive bidding process, and the successful candidate will be the one who demonstrates both technical competence and competitive pricing.
