IMPLEMENTATION AND SUPPORT OF THE
STANDALONE BONDED NETWORK SOLUTION
FOR INTERNET ACCESS

JULY 2025

1. Introduction

The Development Bank of Southern Africa (the “DBSA” or the “Bank”) primarily plays a key role in the planning, preparation, funding, building and maintenance phases of the infrastructure development value chain. All the value chain components incorporate fundamental administrative activities such as documentation, procurement, and reporting. The diagram below illustrates our infrastructure value chain, numerous services, and key target markets per value chain segments.

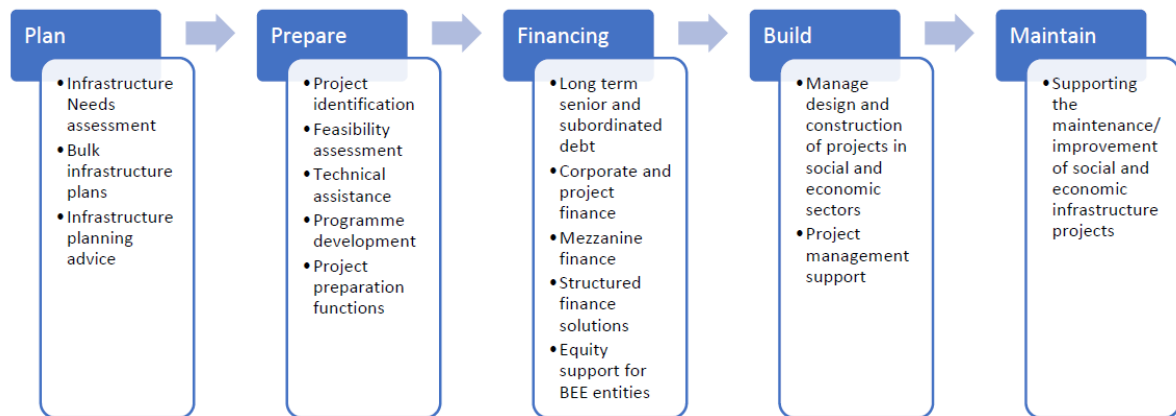

FIGURE 1: DBSA VALUE CHAIN

South Africa has concluded various binational and trade agreements with countries across the continent to support broader regional integration in line with the SADC (Southern African Development Community) Integrated Infrastructure Development Plan, the Programme for Infrastructure Development in Africa (PIDA) and AU (African Union) Africa Agenda 2063. The regional development and integration strategy of the DBSA is aimed at both SADC and the rest of Africa.

2. Purpose

The Development Bank of South Africa (DBSA) would like to invite proposals, from prospective bidders to the Development Bank of Southern Africa Limited (DBSA) to submit RFP for the Implementation and support of a standalone stable and secure bonded network solution for internet access for the period of three years. The solution will be used as and when necessary to support special hybrid events which require stable dedicated connectivity.

3. Background and Context

The Development Bank of Southern Africa (DBSA) Internet connectivity is provided through a Direct Internet Access (DIA) network using SDWAN technology which is provided through a network provider. The network is segregated and provides for both production needs, employee general Internet access as well as guest internet access. In addition to a general increase on hybrid meetings running on the same production network, the Bank is increasingly receiving a number of requests to host hybrid meetings and events for a number of stakeholder organisations. This is beginning to put a strain on the production network and DBSA would therefore like to procure a separate standalone network which is stable and secure.

4. Scope of Work

The DBSA seeks to appoint a single, reputable service provider to successfully supply, design, implement and support a standalone stable and secure bonded network solution for internet access for the period of three years.

5. Functional Requirements
