17.3 The determination of the DBSA as to the actual time that a Bid is lodged is final. Subject to clause 17.2, all Bids lodged after the Closing Time will be recorded by the DBSA and will only be opened for the purposes of identifying a business name and address of the Bidder. The DBSA will inform a Bidder whose Bid was lodged after the Closing Time of its ineligibility for consideration. The general operating practice is for the late Bid to be returned within 5 (five) working days of receipt or within 5 (five) working days after determination not to accept a late Bid.

- 20.3 The DBSA may permit a Bidder to correct an unintentional error in its Bid where that error becomes known or apparent after the Closing Time, but in no event will any correction be permitted if the DBSA reasonably considers that the correction would materially alter the substance of the Bid or effect the fairness of the Tendering Process.

21. OBLIGATION TO NOTIFY ERRORS

If, after a Bidder's Response has been submitted, the Bidder becomes aware of an error in the Bidders Response (including an error in pricing but excluding clerical errors which would have no bearing on the evaluation of the Bid), the Bidder must promptly notify the DBSA of such error.

TERMS OF REFERENCE (TOR)

APPOINTMENT OF A CONSULTANT OR CONSORTIUM TO CONDUCT PRE-FEASIBILITY STUDIES FOR THE SOCIALLY OWNED RENEWABLE ENERGY (SORE) INITIATIVE AND THE PARTNERING IMPLEMENTATION MODEL (PIM).

1. PURPOSE

This document sets out the Terms of Reference (“ToR”) for the recruitment of a suitably qualified consultant or consortium to conduct pre-feasibility studies for the Socially Owned Renewable Energy (SORE) Initiative and priority projects identified through the Partnering Implementation Model (PIM).

2. INTRODUCTION

The Development Bank of Southern Africa (DBSA), in partnership with the Presidential Climate Commission (PCC), is implementing the Advancing an Inclusive Just Transition Financing Mechanism (JTfM) with support from the International Climate Initiative (IKI) of the Government of Germany. The JTfM seeks to accelerate South Africa’s Just Transition by identifying, preparing and mobilising investment into catalytic projects that promote economic diversification, climate resilience, social inclusion and sustainable livelihoods, particularly in municipalities and regions affected by the energy transition.

The DBSA is a leading South African development finance institution (DFI), mandated to finance and prepare infrastructure projects that promote sustainable socio-economic development, economic growth and regional integration. The PCC is an independent multi-stakeholder advisory body established to guide and support South Africa’s Just Transition by fostering collaboration among government, business, labour, civil society and communities, and by providing strategic advice on climate policy and implementation.

To achieve its objectives, the JTfM focuses on strengthening the pipeline of investment-ready and bankable projects capable of attracting public, private and blended finance while ensuring that communities, workers and local institutions actively participate in shaping and benefiting from the transition. The programme combines strategic project preparation with inclusive stakeholder engagement to advance promising local initiatives from concept development to implementation.

Within this context, the JTfM has prioritised two complementary workstreams: the Socially Owned Renewable Energy (SORE) initiative, which promotes inclusive renewable energy ownership models that expand local participation in the green economy and energy generation sector, and the Partnering Implementation Model (PIM), which provides a structured multi-stakeholder platform for identifying and prioritising catalytic projects that support local economic diversification and Just Transition outcomes.

To advance these workstreams, the DBSA and PCC seek to appoint a suitably qualified and experienced consultant or consortium to undertake two complementary pre-feasibility studies across selected municipalities in the Eastern Cape, KwaZulu-Natal and Northern Cape, with an initial focus on Nelson Mandela Bay Metropolitan Municipality, Newcastle Local Municipality and

Dawid Kruiper Local Municipality. While the appointment will be procured under a single consultancy contract to promote consistency in methodologies, stakeholder engagement and project preparation, the SORE initiative and PIM will remain two distinct pre-feasibility studies, each with its own scope of work, deliverables and outputs.

3. BACKGROUND

South Africa is advancing a Just Transition towards a low-carbon and climate-resilient economy and society. This transition presents both risks and opportunities for local economies, particularly in regions affected by industrial restructuring, energy insecurity, unemployment, inequality, and climate vulnerability.

The SORE Initiative seeks to explore renewable energy ownership models that broaden participation beyond traditional independent power producer structures. These may include community-owned systems, worker-owned renewable energy facilities, municipal or co-operative models, township energy co-operatives, hybrid ownership arrangements, and community participation in utility-scale renewable energy projects.

The PIM is a collaborative framework designed to facilitate inclusive, multi-stakeholder engagement, consensus building, and coordinated implementation of initiatives that support economic diversification, sustainable livelihoods, and Just Transition objectives. Through the PIM process, stakeholders will identify priority catalytic projects requiring pre-feasibility assessment before they can proceed to detailed feasibility, project preparation, financing, or implementation.

As part of the JTFM programme, preliminary stakeholder engagement and opportunity screening were undertaken to identify locations with the greatest potential to demonstrate socially owned renewable energy and catalytic Just Transition interventions. The municipalities were selected based on their renewable energy resource potential, industrial and municipal energy demand, stakeholder readiness, and opportunities to support local economic diversification and inclusive development. Nelson Mandela Bay presents strong potential due to its significant industrial electricity demand and favourable wind and solar resources; Newcastle offers an established industrial base, existing grid infrastructure and opportunities for industrial decarbonisation; while Dawid Kruiper benefits from exceptional solar resources, available land and proximity to transmission infrastructure, creating favourable conditions for socially owned renewable energy development.

The assignment comprises separate pre-feasibility studies for the SORE Initiative and the PIM, each with distinct objectives, scope of work, deliverables and outputs. The consultant or consortium will assess project readiness, identify viable opportunities and constraints, explore

implementation and financing pathways, and provide recommendations for further project development.

- Assess the preliminary viability of SORE opportunities across the selected municipalities.
- Undertake pre-feasibility studies for priority projects identified through the PIM process.
- Identify project opportunities, risks, constraints, implementation pathways, and financing options to guide future feasibility studies and project preparation.

4. SCOPE OF WORK

The appointed consultant or consortium will conduct pre-feasibility assessments for SORE opportunities and PIM-identified priority projects in the selected municipalities. It should be noted that these will remain two distinct pre-feasibility studies with separate scopes, deliverables, and outputs. The scope of work includes the following components:

1.4.1. Project Scoping and Concept Review

3. Identify and review SORE opportunities and priority projects emerging through the PIM process and refine them into structured preliminary project concepts, including objectives, beneficiaries, assumptions, constraints, opportunities, and implementation considerations.

2.4.2. Stakeholder Analysis and Engagement

1. Identify and map key stakeholders, including municipalities, communities, organised labour, business associations, government entities, investors, technical experts, development finance institutions, and civil society organisations.
2. Assess stakeholder interests, influence, readiness, concerns, and potential roles in SORE and PIM project implementation.
3. Develop and implement an inclusive engagement approach that promotes transparency, participation, and local ownership throughout the pre-feasibility process.

3.4.3. Site Identification, Resource Screening, and Technical Assessment

1. Undertake preliminary site screening based on land availability, energy demand, grid proximity, infrastructure access, environmental sensitivities, and socio-economic considerations.
2. Conduct high-level renewable energy resource screening for solar, wind, hybrid, microgrid, or other relevant distributed energy options.
3. Assess preliminary technology options, infrastructure requirements, grid integration considerations, technical constraints, and mitigation considerations.

4.4.4. Financial, Economic, and Market Assessment

1. Develop indicative capital and operational cost estimates for SORE opportunities and PIM priority projects.
2. Assess preliminary revenue opportunities, affordability, financial sustainability, and potential funding mechanisms.
3. Explore grants, blended finance, concessional funding, community investment models, public-private partnerships, and other financing options.
4. Assess market demand, local economic development potential, job creation, skills development, enterprise development, and alignment with municipal, provincial, and national priorities.

5.4.5. Social, Environmental, Legal, Regulatory, and Institutional Assessment

1. Undertake preliminary social, economic, and environmental screening, including potential benefits, risks, sensitivities, and mitigation considerations.
2. Assess community benefit, inclusion, ownership, governance, institutional readiness, and implementation arrangements.
3. Review relevant legal, policy, permitting, licensing, land-use, energy-sector, and municipal regulatory considerations.
4. Identify regulatory barriers, institutional gaps, enabling conditions, and compliance requirements that may affect future implementation.

4.6 Risk and Implementation Assessment

- 1) Identify institutional, financial, technical, regulatory, environmental, and socio-political risks
- 2) Develop mitigation measures
- 3) Identify implementation pathways and institutional arrangements
- 4) Assess partnerships and readiness for implementation

5. DBSA AND PCC ENGAGEMENT

The appointed consultant or consortium must engage with DBSA and PCC to develop a shared understanding of the assignment, including:

1. The objectives, scope, outputs, and intended outcomes of the SORE Initiative and PIM pre-feasibility assignment.
2. The priority municipalities, stakeholders, engagement requirements, project preparation needs, and reporting expectations.

3. The coordination arrangements, reporting lines, approval processes, steering committee requirements, and timelines for implementation.

5.1. The following documents and information may be shared with the appointed consultant or consortium:

The DBSA and PCC may, where available and deemed appropriate, facilitate access to relevant information, documentation, and stakeholder contacts to support the execution of the assignment. Such support may include, but is not limited to:

1. SORE background documentation, related PCC recommendations, and relevant renewable energy ownership materials.
2. PIM background documentation, stakeholder engagement outputs, and priority project information.
3. Municipal, provincial, and national planning documents relevant to the selected locations.
4. Stakeholder lists, engagement plans, site information, and relevant project concept documentation.
5. Any other documents deemed necessary by DBSA or PCC.

The service provider will remain responsible for identifying, obtaining, validating, and analysing all information required to successfully complete the assignment.

6. EVALUATION CRITERIA

6.6.1. Compliance Requirements

The bidder must provide a valid proof of Professional Indemnity Insurance with a coverage value that is equal to or greater than the total value of the bidder's submitted financial offer. 2. Price proposals will be scrutinized to verify the absence of arithmetical errors, omissions, and inconsistencies. Bidders will be notified of all errors or omissions that are identified in the tender offer and either confirm the bid offer as tendered or accept the corrected total of prices.

- Bidders are kindly cautioned that the pricing proposal should be submitted in A SEPARATE FOLDER clearly marked “pricing proposal”. The proposal should not be combined with any of the other submissions, including the resource matrix, CVs, project reference list, methodology and approach proposal because these qualitative and other criteria are sought to be assessed independently of the pricing proposal.

BIDDERS WHO FAIL TO SUBMIT THEIR PRICING PROPOSAL IN A SEPARATE FOLDER MAY FACE DISQUALIFICATION FROM THE PROCESS.

- This assignment will be a fixed-price contract, notwithstanding that cost components may be based on hourly rates. Accordingly, the consultant is required to propose pricing on a lump sum basis, broken down by stages (detailed in Table above). The pricing per stage must be split per deliverable in that stage.

- The scope of work will require the successful bidder to travel or engage key stakeholders of the project. Therefore, the price offer should be all-inclusive.
- All prices and rates should include associated disbursements and exclude VAT. Bidders must account for discounts and inflation in their pricing, as no price escalation will be permitted during implementation. All rates agreed with shall be fixed and final. Bidders must ensure that all disbursements are accurately priced and clearly itemised in their submissions. Any omission, understatement, overstatement, or incorrect pricing of disbursements shall be at the bidder's risk and may not constitute grounds for a claim for additional compensation after contract award. **The Total tendered amount at the bottom shall include 15% VAT.**
- Should bidders require any additional information to complete their quotations, all queries must be submitted via email. Responses to such queries will be provided in writing and copies of replies will be circulated to all bidders to ensure fairness and transparency.
