

Item no.	RFP181/2026 Question / Enquiry / Query	Response
1.	Where a bidder uses a subcontractor, should the subcontractor's details appear in Part A, or only its TCS PIN / CSD proof (Part B, clause 2.5) as a separate attachment? If separate, in which folder or annexure should it be placed?	Where a bidder intends to utilise a subcontractor, the subcontractor's Tax Compliance Status (TCS) PIN and/or CSD registration details must be submitted as a separate attachment in accordance with Clause 2.5 of Part B. The RFP specifically requires that each subcontractor submit separate proof of TCS/PIN/CSD compliance. The bidder's details must still be completed in Part A. While the RFP does not prescribe a specific annexure for subcontractor compliance documents, bidders are encouraged to include these documents in Folder 1 (Pre-Qualifying Criteria and Functional Submission) together with the other returnable compliance documents, clearly labelled under a section titled "Subcontractor Compliance Documentation."
2.	Must subcontractors be disclosed in the bid, and are any further documents required from them beyond clause 2.5?	Yes. Where a bidder intends to use subcontractors for the execution of the assignment, such subcontractors should be clearly disclosed in the proposal, including the scope of work they will perform and their role within the project team. Beyond the requirement contained in Clause 2.5 requiring separate proof of TCS/PIN/CSD compliance for each subcontractor, the RFP does not prescribe any additional mandatory compliance documentation specifically applicable to subcontractors.

Item no.	RFP181/2026 Question / Enquiry / Query	Response
		However, where subcontractor personnel are proposed as part of the delivery team and their qualifications and experience are relied upon for functionality scoring, the relevant supporting documentation (e.g. CVs, qualifications, project experience and any supporting evidence required under the evaluation criteria) should be submitted accordingly as part of the functional proposal.
3.	Section 4.3 (Workstream 3) lists three sites for site-based SROI assessments (Alexandra, Louwsburg and Waterberg), while the Background and Workstream 4 refer to five sites (also Jabulani and Westridge). Please confirm for which sites site-specific SROI assessments are required.	1. Jabulani (Gauteng) 2. Westridge (Western Cape) 3. Alexandra (Gauteng) 4. Louwsburg (KwaZulu-Natal) 5. Waterberg (Limpopo)
4.	The annexure labelling in the RFP appears to be inconsistent: - The Part C checklist lists Annexures A to K, including Annexure A (Price Proposal Requirement), Annexure J (General Conditions of Contract) and Annexure K (CSD Tax Compliance Status and Registration Requirements). - The headings in the document run from Annexure B to Annexure I, including Annexure D (restricted suppliers questionnaire, page 46), Annexure H (General Conditions of Contract) and Annexure I (Tax Compliant Status and CSD Registration Requirements). - Section 8.3 of the Terms of Reference describes Annexure A as the presentation briefing document, whereas the Part C checklist describes it as the Price Proposal Requirement. Please confirm which annexures are required in the bid submission, and the label each should carry.	The DBSA acknowledges that there are inconsistencies in the annexure references and numbering contained in the RFP documentation. For purposes of bid submission, bidders should be guided by the content and prescribed forms themselves, rather than the annexure numbering discrepancies. The annexures required for submission are those attached to the RFP and should be submitted under the headings reflected in the actual annexure documents. The annexure numbering inconsistencies will not prejudice bidders. DBSA will evaluate submissions based on the information and documents provided in accordance with the RFP requirements. Bidders are encouraged to clearly label documents using the annexure titles contained in the RFP and ensure that all mandatory returnable schedules and declarations are included in their submission.
